JMEC employees participating in fire extinguisher training. Second half of the training session included handling and utilization of an actual fire extinguisher as seen above.

In February, employees at Jemez Mountains Electric Cooperative received fire extinguisher training.

The training was given by John Lucero of Cintas at the Co-op facilities in Espanola, New Mexico.

During his presentation, John presented employees with a 10 question

“Not only is it good to have a fire extinguisher at home, but it is equally important to understand how it is used”.

John Lucero

Cintas instructor

learning exercise consisting of true or

false questions. One of those questions asked was: *Once a fire extinguisher has been used or the seal has been broken, it should be considered empty, true or false?* Well, If you answered *true*, you are certainly correct.

“Not only is it good to have a fire extinguisher at home, but it is equally important to understand how it is used” said John Lucero.

With the recent
Natural Gas
outage in the JMEC
service areas...

Why not consider

an

electric source of heat for your home?

During the natural gas outage, you would have kept your home warm, saved your water pipes from freezing and your electric bill would not have jumped up by the use of space heaters.
