Pole Inspection and Visual Patrol of Transmission Poles

In an effort to better serve the members of Jemez Mountains Electric Cooperative, **JMEC** in conjunction with **Power Pole Inspectors (PPI)** and **Transmission & Distribution Services (T&D Services)**, the following work will be conducted on both transmission and distribution systems: pole inspections and visual inspections.

Work will be conducted in the following areas: **Truchas, Cordova, Chimayo, Cundiyo, La Puebla, El Rancho, San Ildefonso, Pojoaque, Nambe, AT&T towers, Santa Fe Ski basin area, La Mesilla, Sombrillo, Santa Cruz, Corlette Rd., Embudo, Velarde, Lyden, Dixon and Native American lands where JMEC facilities are located.**

By regulation, inspections are conducted yearly to test the integrity of the transmission and distribution system infrastructures. During inspections, we will be checking for damaged and rotting of poles, broken insulators and performing any necessary preventative maintenance.

On-going inspections will be conducted September thru December 2011.

Thank you for your outmost of patience in our continued effort of keeping your electrical distribution and transmission systems safe and reliable.
